

The Eatery

Summary: This is a recipe application that will allow you to search, view, add, and save recipes while also being able to get nutrition facts at the same time.

CHECKLIST

Planning

- ☒ ~~project includes a wireframe for each view~~ **Done**
- ☒ ~~project includes a list of MVP features * (search recipe, view recipe, add recipe, view nutritional facts)~~
- ☐ project includes a data model

MVP

- ☒ ~~app has at least 3 main features * (search recipe, view recipe, add recipe, view nutritional facts)~~
- ☒ ~~front end makes a request to the server and handles the response *~~
- ☒ ~~front end is interactive *~~
- ☒ ~~app has custom styling *~~

Front End

- ☒ ~~app has at least 5 semantic tags * (figure, figcaption, section, form, header)~~
- ☒ ~~app includes 1 view *~~
- ☒ ~~app includes 1+ additional view(s)~~
- ☒ ~~styling includes flexbox~~
- ☒ ~~at least 1 view is responsive~~
- ☒ ~~styling includes animations~~

Server

- ☐ app includes a GET endpoint and handler function *
- ☐ app includes a POST endpoint and handler function *
- ☐ app includes a PUT endpoint and handler function
- ☐ app includes a DELETE endpoint and handler function
- ☐ app utilizes Sequelize
- ☐ project includes at least 1 controller file

Database

- ☐ project includes a seed file or function
- ☐ app uses 1 table
- ☐ app uses 1+ additional tables
- ☐ app uses a foreign key and join

Presentation

- ☐ discusses project purpose and demonstrates MVP *
- ☐ does not discuss broken/unimplemented features
- ☐ recording is between 2-3 minutes

Summary

- You have about a week and a half to work on this.
- You need to plan before you code.
- Your app should have at least 3 main features and a styled, interactive front end that's connected to a back end.
- You need to score at least 70 points to pass.
- You will be presenting these projects at the end of Foundations.

Menu

Health Shots
